Catatan review:

1. Referensi dari jurnal masih terbatas. Belum ada referensi dari jurnal internasional.
2. Metode penelitian lebih diperjelas lagi, terutama dalam pengambilan sampel (lihat catatan dalam naskah)
3. Karakteristik responden tidak perlu dalam bentuk tabel-tabel, cukup diceritakan secara umum
4. Dalam menganalisis data (membahas tabel) jangan mengulang-ulang angka yang sudah ada dalam tabel. Tetapi berikan analisis kualitatif dan mendalam mengenai makna dari angka-angka yang sudah ada dalam tabel tersebut.
5. Perhatikan teknik penulisan.
 - a. Kalimat jangan terlalu panjang-panjang. Kalimat-kalimat panjang dalam naskah ini sebenarnya dapat dipenggal-penggal atas beberapa kalimat.
 - b. Paragraf jangan terlalu panjang-panjang.
6. Rekomendasi jangan terlalu umum. Rekomendasi harus mengacu pada hasil penelitian yang dibagi atas rekomendasi teoritis dan rekomendasi praktis

Part 3: Paper Review Report

General comments

I think that this is a good paper and it is of realistic value and significance to study this topic.

Specific comments

1. Reference from the journal is still limited. There are no references from international journals.
2. The research method is further clarified, especially in sampling
3. Discussion of the characteristics of respondents need not be in the form of tables, it is sufficiently discussed in general
4. In analyzing data (discussing tables) do not repeat the numbers that already exist in the table. But provide a qualitative and in-depth analysis of the meaning of the figures that already exist in the table.
5. Pay attention to writing techniques.

- a. The sentence should not be too long. Long sentences in this text can actually be beheaded for several sentences.
 - b. Paragraphs don't need to be too long.
6. Recommendations don't be too general. Recommendations must refer to the results of the study which are divided into theoretical recommendations and practical recommendations
