

## CHAPTER V

### CONCLUSION AND SUGGESTION

#### 5.1 Conclusion

Based on the result of the research, it can be concluded that the DPDP model has an effect on students' speaking skill, it claimed that the use of describing picture in the teaching of speaking in descriptive text was effective. First, the result of the data analysis indicated that the students' speaking achievement in terms of pronunciation, grammar, fluency, and vocabulary has increased from pretest to post-test. The result of the post test in the experimental class was better than in the control class because the use of the DPDP model can help the students to develop their speaking skill.. Additionally, it can help the students to develop the four components in speaking. It can be seen from the result of their pre test and post test in terms of score. It means that the treatment by using the DPDP model has a significant effect on students' speaking skill.

#### 5.1 Suggestion

Based on the result of the research, the use of the DPDP model helped the students to develop their speaking skill in terms of their pronunciation, grammar, fluency, and vocabulary. It is suggested to the English teacher to use the DPDP model as an alternative way to teach speaking.

Teachers should be able to choose an appropriate media in which to improve the students' motivation in teaching and learning process. If the students are motivated and interested in the teaching and learning process of speaking, the students can experience speaking practices joyfully. One of the media is picture. Pictures are considered effective to be implemented in the teaching and learning process of speaking. They valuable resources as they provide a shared experience in the classroom, a need for common language

forms to use in the classroom, a variety of speaking practices which are fun and able to improve the students' speaking abilities not only in the aspect of the students' pronunciation, but also their fluency, grammar, and also vocabulary.

This research discusses the effect of using Discuss-Pair-Discuss Picture model toward speaking skill at SMPN 18 Tebo. This research is expected that the result of the research can be used as an additional reference for the other researchers, especially researchers who are dealing with the teaching of speaking. The researcher also hopes further research can improve the lack of this research.
