CHAPTER V

CONCLUSION AND SUGGESTIONS

This chapter devoted to present the conclusion based on the data that have been analyzed in the previous chapter. Then there is a suggestion for the teacher, students, and the next researcher.

5.1 Conclusion

According to the research finding and discussion of this study above, the researcher concludes this section. The conclusion are representing in the following: based on the results of the questionnaire and clarification in the interview, most of students were proven like to have learning speaking material directly in a class. Students do perceive the online learning in speaking material was negatively according to the percentage results on seventh statement of the questionnaire.

5.2 Suggestion

Based on the conclusion above, the researcher has a suggestion as following:

5.2.1 For the Lecturer

From this study, the lecturer will know the students' perceptions toward online learning in speaking class, and by knowing this problem, the lecturer can strategize and choose the appropriate media that can be applied for online learning in speaking class. The teachers should motivate the students to be motivated to use different media with different lecturer.

5.2.2 For the Other Researcher

This study suggests for the other researcher to only focus on one medium to know better whether the media is effective or not used for online learning media in the speaking class. This study will help them to improve their study and also for their reference in their research, and gives academic information for future research, especially in online learning in speaking class.

5.2.3 For the Students

From this study, students will know about other students' perceptions toward online learning in speaking class, and can increase students' knowledge about these issues.
