CONCLUSIONS AND SUGGESTIONS

This chapter presents two parts, namely conclusions and suggestions. The first part deals with the conclusions of the research. The second part deals with the suggestions for the teacher and students.

5.1 Conclusion

The questionnaire result showed how students' perception on learning English through E-Learning at English Education Study Program Jambi University. In general, all of the indicators in the questionnaire are concluded that dominant result is answering "YES". There is 75% value about answering "YES". It means there is high value of students' dominantly answering "YES", it can be concluded from the questionnaire that students' perception on learning English through E-Learning at English Education Study Program Jambi University have a good perception in using E-Learning for Learning English.

From the finding discussions earlier, it could be concluded that students have a good perception on E-Learning in learning English., they believe that E-Learning give them satisfaction while using this supplementary tool. The satisfaction is specifically toward the user satisfaction, their satisfaction with accessibility and availability to the material or resources in the E-Learning and the easy of using this tool to support them learning English.

E-Learning save effort and time by doing and submitting assignment electronically. Students agreed that E-Learning helps them by doing and submitting an assignment. Students did not need to do the assignment by writing in the paper

and submitting it to lecturers. By using E-Learning it makes it easier for students to learn by himself and do an assignment. E-Learning gives students motivation for learning English. As we can see from the result of the questionnaire students agree that E-Learning gives them the motivation to learn English. E-Learning makes it easy for students to find material. students can also study independently, anywhere, and anytime using E-Learning.

5.2 Suggestion

From the conclusion above, the researcher has several suggestions.

For students, the researcher suggests to learn more about how to use E-Learning wisely and properly especially for learning English.

For lecturers, I would suggest to applying E-Learning in all subjects. E-Learning helps students in learning English. The convenience provided by E-Learning increases student motivation. Students become more enthusiastic about the use of E-Learning. Because nowadays students are used to the existence of technology.

The current study offers recommendations for further studies, this study only takes a portion of the sample from semester VII and produces the data that has been described above. It is hoped that further research can continue this research in the next generation so that more diverse data can be obtained. Other subjects that can be used can be from E-Learning.
