

CHAPTER V

CONCLUSIONS AND SUGGESTIONS

This chapter presents the conclusions and suggestions based on findings and discussions of the data analysis.

5.1. Conclusions

Based on the research results, it can be concluded that the use of student worksheets to improve the effectiveness of English learning at SMP Negeri 17 Kota Jambi when viewed from the results of the analysis of survey data of questionnaire distributed to 76 respondents of grade VIII students of SMP Negeri 17 Kota Jambi showed that respondents were given a good perception of the use of worksheets and also the questionnaire data showed an average percentage of 73.43%, which means that the use of this worksheet is effective in their English learning. In addition, it can be proven by the increase in grade VIII students of SMP Negeri 17 Kota Jambi from their mid-semester test scores to their final scores. It increases can be seen in the results of the analysis of the percentage of 76.31% and the average final score of students has reached 83.19.

5.2. Suggestions

This worksheet can be continued to be applied in English learning activities that follow the correct procedures. Research that researcher has carried out shows that student worksheets affect English learning outcomes while learning at home. Therefore, SMP Negeri 17 Kota Jambi must continue to pay attention to things that can support the learning process during the pandemic. In addition, students should continue to use worksheets in learning activities at their home because it is proven that these student worksheets make it easier for students to understand the material not delivered by the teacher orally. Moreover, student worksheets can cover all students who are not supported in the online learning process, such as gadgets and the internet.
