-----  
Reviewer A:

Title:  
Oil Palm Responses to Indigenous Mycorrhizae and Cow Manure at Ultisols

General Decision:  
Accepted with major revision

Comment for author:  
The paper requires extensive revision, particularly on the use of grammatically incorrect English, the improper use of words, incorrect sentence composition, and spelling error. Please consult the standard English publication style as used in the leading international journal, such as Agronomy Journal. The use of bar chart, by including the statistical analysis on the chart, may improve the clearness and ease the comprehension of the data. Check the highlighted sentences and recompose it if necessary or use the right words.
