Comments to the Author

The research seems up-to-date and interesting in terms of its subject. Although the abstract title is not too long, it is suitable for the purpose.

It was also good that the abstract of this research was in the form of a structured summary. In other words, it would be good to write a summary that includes the purpose, method, data collection tool and summary of the results.

However, the research findings should be briefly mentioned in the abstract.

The introduction of the research is appropriate in terms of literature.

The introduction part of the research is sufficient in terms of subject area. The bibliographies used are up-to-date. Therefore, the use of new bibliography in the introduction and discussion sections of the research has enriched the research.

Purpose and sub-objectives were written in line with the findings.

The research method is well written. A mixed research method was used in the research. It would be better to write the research design for quantitative and qualitative studies in research. Care was taken to write the tables used in the research in the form of the APA6 standard.

It would be better if the results of the research were written in a comparative way and instead of the word "interval" in each table, what the given interval was for was written. The validity and reliability of data collection tools should be addressed in the research.

In the research, the discussion section was written. However, the conclusion part was not written according to the findings. It would be better to write the recommendations section.
