Dear author,

We are pleased to inform you that we have found your manuscript within the aim and scope of the Journal.

However, before sending for a detailed review, we want to confirm that you are aware about the Article Processing charges (APC) of \$1800. The fee is to cover the review cost, website hosting, formatting, English proofreading etc.

Upon your confirmation, the manuscript will be reviewed and detailed comments shall be sent to you. The APC will be required to pay within two weeks after receiving the reviewers' comments.

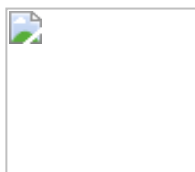

Please let us know your willingness so that we can process your manuscript for the next step.

Thanks and regards

Editorial Team

Dear author(s),

Reviewers have given their comments on your paper. Please incorporate these corrections within 15 days and send us the revised versions. In the final version you can add the authors' names, affiliation and ORCID number of each author.

These comments have also been uploaded in our system. Please ensure the submission of the revision within 10 days of receiving this mail either as a reply to this mail or in the online system. If your revision is found satisfactory, an acceptance letter will be issued for your manuscript. You will be required to pay the APC \$1800 (that you have agreed upon) within one week after receiving the acceptance letter.

Reviewers' Comments

Title: Remove “**It's Effective or Bad**” It is very colloquial. Secondly, you are not discussing whether ‘god’ or ‘bad’ but whether it helps in achievement of LOs

Abstract Please correct the spelling **ethnomatematic** should be **ethnomathematics**. Change in the whole document. The purpose does not mention “Learning outcomes” You mention PBL learning models in the findings and also in the text at several places except in the methodology section. Please show the relationship of PBL learning models with TPACK in introduction, and methods section. PBL learning models are also not mentioned in the objectives.

Introduction

You refer to a few studies while talking about the problem/ issues but none are empirical or field studies. Please add more information in the last paragraph of this section showing what the problems are (e.g. lack of research, not much attention paid on the subject and how this research aimed to fill the research gap. Please add a little information about **cognitive realm** as it used very often in this study

Conceptual framework. These are Figure (not diagram) Please draw the framework again. What you have used might be a copyright figure. Call it Figure 1 and then continue Figure No 1,2,3.....

You write “Based on the diagram, it appears that ethno-mathematics are integrated with TPACK which will form an interesting learning concept and it is possible to improve students' learning outcomes.” Please explain how the framework/ figure it showing the integration of ethno-mathematics with TPACK and where ‘learning outcomes’ is mentioned in the figure. You may say that “proposed integration” since you call it a framework of this study

Please review the objectives: you're not identifying what are learning outcomes but measuring more or less are the LOs by using TPACK; and TPACK + ethno-mathematic. The 1st and 3rd objective seems to be the same.

Research Sample How many students in each group? You may show the demographic characteristics of the sample (age, education, experience, etc) in a tabular form.

Research Instrument How did you ensure the validity of the questions/ items? Please add the validity of the test instrument. Please give the full form of RPP and LKPD (when mentioned first time).

Research Method This is OK (except grammar and language errors e.g., mix of present, past and future tense,)

Results This is OK (except grammar and language errors e.g., mix of present, past and future tense,)

On page 7 you are discussing the Hypotheses but these were not mentioned in the Methods section. Please check and add hypotheses after research objectives, even if you are not testing them, or remove from all places

Figure 3: descriptive statistics are not shown in bar graphs, please prepare statistical table

Please use correct figure number when you explain them in the text. Check with all figures

Discussion, Conclusion Recommendations

You mention PBL learning models in the findings and also in the text at several places except in the methodology section. Please show the relationship of PBL learning models with TPACK in introduction, and methods section. PBL learning models are also not mentioned in the objectives “What are social arithmetic materials?” mentioned here for the first time? A conclusion should summarize the findings and show how the study contributes to the domain of research. Please check

General: Please check language and syntax (sentence construction) errors. The language used is Indonesian English and (somewhere Turkish English) as there are a lot of translated phrases.

Spelling mistakes **ethnomatematic** should be **ethnomathematics**

Recommendation: Accept after Corrections
