Comments to the Author

The research seems up-to-date and interesting in terms of its subject. Although the research title is not too long, it is suitable for the purpose. It was also good that the abstract of this research was in the form of a structured summary. In other words, it would be good to write a summary that includes the purpose, method, data collection tool and summary of the results. The introduction of the research is appropriate in terms of literature. The introduction part of the research is sufficient in terms of subject area. However, a new bibliography should have been used in the introduction and discussion sections of the research. For example, "Sadıkoğlu, S., Akdağ, Ş., Tezer, M., & Khalilov, R. (2021, August). EFL Teachers' Competencies According to Student Opinions. In International Conference on Theory and Application of Soft Computing,

Computing with Words and Perceptions (pp. 630-635). Springer, Cham."

Purpose and sub-objectives were written in accordance with the findings.

The research method is well written. However, no information was given on the validity and reliability of the data collection tool.

Information on the distribution of data should also have been given. Otherwise, we cannot use parametric tests.

Care was taken to write the tables used in the research in the form of APA6 standard.

In the research, the discussion part was not interpreted with current citations. The conclusion and recommendations section was written in accordance with the findings.

Reviewer Comments -2

- Subtitle contents specified are not consistent with the title. For example in research design the author should explain the design only not the sampling. That information should be in sampling. So organization should be corrected especially in methodology.
- The discussion part is insufficient. Required literature review has not been done.
- Reference giving should be checked.

Reviewer Comments-3

The subject of study is current and interesting. The structure of the study is clear and understandable when examined. language must be checked. we dont prefer to use "we, you" in scientific papers. Use passive sentences. City name and statistical data should not be given in the summary. The introductions title should be changed to introduction. Result title should be changed to results. Conclusion section should be expanded. Limitations of the research can be added. References should be arranged in accordance with APA standards and the DOI or link of each reference should be given.
