

## **CHAPTER V**

### **CONCLUSION AND SUGGESTION**

This chapter includes the conclusion derived from analysis and suggestion from researcher for the students, teacher and future research.

#### **5.1 CONCLUSION**

From the finding and discussion the researcher conclude that the students from SMK 2 face in speaking are 2 difficulties, they are psychological and language difficulties. From the analysis, psychological problems that students face are lack of confidence, nervous, lack of motivation, and fear of making mistakes. On the other hand, language difficulties that they were facing are pronunciation, mother tongue use and lack of vocabulary. The researcher also found how the students overcome their difficulties in speaking English. Their strategy was using dictionary, asking teacher and memorizing vocabulary. Furthermore, most of them feel that their strategies are helpful.

#### **5.2 SUGGESTION**

Based on the conclusion, it is suggested that the students increase their confident in speaking and not fear making mistake when speaking. The researcher also suggest that the students to overcome their nervousness in when speaking and learn how to pronounce word properly through self-learning or with the teacher. Furthermore, the researcher suggested that the teacher switch the method in teaching English to student-centered learning instead of teacher-centered. In addition, the researcher suggests the other researcher to conduct larger studies and used both qualitative and quantitative method to find more comprehensive result.
