Assalamualaikum wr.wb,

Good morning and best wishes to all of us ..

By chanting the name of Allah, The Most Gracious and Most Merciful, let us express gratitude, so that this bright morning we can be present by online in a healthy state to participate in the -8th Anniversary of the Faculty of Medicine and Health Sciences, Jambi University. To ALLAH SWT, we hope that pleased to always bestow peace, prosperity, love and abundant blessings in this beloved campus. Let us also be grateful that at the age of 8 years, FKIK UNJA continues to grow to fill this day and beyond by educating the nation's children to build Indonesia's future with work, creativity and innovation as well as the spirit of progress and togetherness.

The Faculty of Medicine and Health Sciences of Jambi University (FKIK UNJA) was officially established on October 10, 2012 based on Jambi University Chancellor's Decree Number 748 / UN21 / DT / 2012 concerning the Establishment of the Faculty of Medicine and Health Sciences of Jambi University, which was originally as Program Studi Pendidikan Dokter based on operational permit SK no. 1369 / D / T / 2005 dated 10 May 2005. The establishment of PSPD Unja was the result of the struggle of Jambi community leaders at that time who were concerned about the health conditions in the province of Jambi, especially the constraints of limited human resources for doctors, so the governor (late) Drs. H. Zulkifli Nurdin MBA and Unja Chancellor Mr. Kemas Arsyad Somad SH, MH welcomed the idea of dr. H. Abdul Hamid Syam and formed a taskforce team to compile a proposal for the establishment of a medical faculty where one of the members is Prof. Dr. Sutrisno M.Sc, PhD, who currently serves as the Chancellor of UNja and Prof. Dr.rer.nat.Rayandra Asyhar, M.Si. who currently also serves as vice chancellor for planning, information systems and cooperation.

The Faculty of Medicine and Health Sciences of Jambi University initially consisted of a medical study program, a medical professional study program, a nursing study program, a nurse professional study program and a psychology study program. With the issuance of the Chancellor's Decree 1734 /UN21 / OT / 2020 concerning the determination of the name of the department and the placement of study programs at the faculty and postgraduate level in Unja, FKIK consists of 5 departments, namely medicine, nursing, psychology, pharmacy and public health, with 7 study programs, namely the medical study program, the nursing doctor profession, the nurse profession, psychology, pharmacy, and public health, with an increasing interest in prospective students, both through the snmptn, sbmptn and independent pathways through SMM PTN from year to year. Thank God, all study programs have been accredited by both LAMPTKes and BANPT rank B, while the pharmacy study program which relatively new with limited laboratory facilities and number of human resources is trying its best to improve its ranking to B in 2021. Faculty of Medicine and Health Sciences of Jambi University with the vision: " to become a nationally Medicine and Health Sciences faculty with quality, competitive and entrepreneurial By 2025." Continues to experience changes in a proud direction along with the changes in Jambi University where policy direction and decision making in resource management , infrastructure and other potential for development towards the realization of UNJA as A World Class Agroindustrial and Environmental-based Entrepreneurship University in 2024 with five target achievements abbreviated as SMART acronym, namely: ~Student Achievement; ~ Management Transformation; ~ Academic Reputation; ~ Relevancein Work Graduated; and ~ Technology for Digital Transformation.

Currently FKIK as part of the University of Jambi in accordance with provisions Number 19 of 2014 concerning the Organization and Work Procedure of Jambi University, has compiled the 2020-2024 Strategic Plan of FKIK which clearly has determined performance targets which are of course guided by the university's main performance indicators through the UNja Rector's priority program 2020-2024, UNJA SMART, by remaining focused on preparing qualified graduates who are absorbed in the world of work, qualified lecturers by building a network of Tridharma Perguruan Tinggi on a national and international scale. Thank God, for the 2019-2020 new cpns recruitment, around 20 alumni of the fkik unja have passed the final stage of the Selection for Candidates for Civil Servants for the Formation State Civil Service Agency for 2019. Furthermore, the quality of curriculum and learning is improved in the current context. The Free Learning Policy - The Independent Campus which was launched by the government and has been held at the UNJA campus is a framework to prepare students to become strong scholars, relevant to the needs of the times, and ready to become leaders with a high national spirit, even though the health sector, namely medicine and nursing are not including. We need to report that specifically for the medical profession study program from 2012 to 2020 there were 734 doctors, with UKMPPD CBT graduations in the range of 60% and OSCE 90%, while UKNI for the nurses profession was 234 people from 2016 to 2020.

Specifically for UKMPPD, the numbers of re-taker, who is still failed to passed is around 3%, which is still low compared to the national re-taker, which is around 6%, namely from 2014 to February 2020 there are 56,000 new doctor graduates with a total of 3400 still failed to pass the examination. There are joint steps and efforts to re-accredit the study program in 2023-2024 with the target of achieving superior rank. as well as international accreditation, which is currently being sought for grants to facilitate international accreditation for psychology study programs held by the Ministry of Education

Ladies and gentlemen,

From the achievement of the financial performance in 2020 as a whole is very good and has experienced many improvements compared to the previous year. In 2020, FKIK unja succeeded in increasing its assets to Rp. 37,329,900,668, - increased compared to assets in the previous year. This was achieved with a budget absorption rate of 80% in each fiscal year. Currently the number of permanent lecturers who have nidn is 113, based on the functional position consisting of one professor, namely Prof. Dr. rer. nat. Muhaimin, S.Pd., M.Sc., 1 lektor kepala, 75 with lector positions, 37 asisten ahli, while based on the latest education, there are 9 PhD lecturers and 75 S2 lecturers. This is certainly a great homework for the FKIK Unja community to be able to increase the number of lecturers for the S3 Education strata as well as Professor functional positions and head lecturers by continuing to improve their performance according to the tri dharma function of PT, namely education, research and community service. In addition, specifically for the department of medicine and nursing, it is supported by the presence of 143 clinical educators and 32 CI nurses, both in the main teaching hospital and networks and educational facilities at the puskesmas.

FKIK UNJA always provides stimulation and support for the positive activities of its students, which currently number 2,847 students, through positive activities such as coaching student competencies by organizing competition grants at the faculty, entrepreneurship training programs, then developing talents by establishing innovation units and SMART technology business incubators. , developing entrepreneurial startups by building a network of technology business incubators and cooperation programs in order to strengthen innovation and start-up and scale-up grants, as well as efforts to track alumni by trying to implement entrepreneurial alumni programs. Students from all study programs in FKIK Unja have made many achievements, both locally, nationally and regionally. Such as the winner of student creativity program, student entrepreneurship program, youth collaboration competition. Besides that, currently FKIK UNJA in the achievement of student affairs organizes student soft skill coaching by forming and training peer group counselors, then developing students' talents and interests through student talent interest development programs and of course student welfare services through scholarships where a program to strengthen students who receive scholarship benefits as well as other student services. In the field of research, strengthening and developing research as well as community service, FKIK Unja continues to strive to provide infrastructure, including adequate laboratory facilities. Then strengthen the role and function of the Ethics Committee of Health Research at FKIK Unja which has just carried out training on research ethics and good clinical practice in collaboration with FIRREC (Indonesian Recognized Research Ethic Committee forum) which is funded by the AKSI-ADB project. year 2020.

Currently, FKIK Unja is developing integrated and connected research between fields of expertise, rearranging the research road map based on the potential they have which refers to the university research road map and national priority scale. By constructing a way of thinking, how to learn and how to work it is hoped that it will foster creativity which in turn will produce an innovative research and service product in the FKIK Unja environment. Therefore, in order to provide explanation, we ask Mr. Unja Chancellor Prof. Dr.H.Sutrisno M.Sc.PhD to elucidate as a keynote speaker, with the title "THE ROLE OF UNJA SMART IN PROMOTING INNOVATION AND RESEARCH OF CIVITAS ACADEMIC COLLABORATION IN THE FIELD OF MEDICINE & HEALTH SCIENCE IN THE PANDEMIC TIME of COVID"

in the first international conference that was held conjoin with the 8th anniversary of FKIK Unja this year, inviting international speakers, Prof. Dr. dr. H. Ari Fahrial Syam, SpPD-KGEH, MMB, FINASIM, FACP, FACG. (Dean of the Faculty of Medicine, University of Indonesia), Assc.Prof. Alfi Khatib (International Islamic university malaysia), Dr. Dicky Budiman, M.Sc.PH, PhD (Can) (Australian Griffith University Epidemiologist), Herwansyah, SKM, MPH, PhD (Can) (Department of International Health, Care and Public Health Research Institute (CAPHRI) Faculty of Health , Medicine and Life Sciences Maastricht University), Prof. dr. Hasbullah Thabrany, MPH, Dr.PH. (Professor of the Faculty of Public Health, University of Indonesia), Prof. Dra Juanaiti Sahar, SKp, MApp Sc (Professor of Maternity Nursing at the University of Indonesia) and Prof. Dr. rer. nat. Muhaimin, S.Pd., M.Si. (Professor of the Faculty of Medicine and Health Sciences, Jambi University), in addition to seminars, dissemination of research outputs and community service activities were held, which were not only attended by lecturers and students in the FKIK Unja, but also attended by lecturers / researchers / students from external.

Mr. Chancellor, Ladies and Gentlemen, and honorable invitations.

In this good opportunity, I would like to invite all to increase our cooperation, both to support the student education process (scholarships, public lectures), guidance / mentoring such as leadership, motivation, research collaboration, community service activities with lecturers and students. What is certain is that the spirit of togetherness should be an inspiration to build our collective awareness to improve the quality and competitiveness of FKIK graduates and products in the global arena. FKIK graduates and products in global life will continue to exist if they show an independent capacity in carrying out their duties and responsibilities and are creative in various activities.

We would like to express our gratitude and appreciation to all those who have organized this FKIK Unja Anniversary event and the JAMHESIC 2020 international conference, specifically, to the organizing committee and all parties that we cannot mention all of. Hopefully what you have done for this activity will be recorded by Allah SWT as an act of worship and receive a reward from HIS. Amen.

Finally, I would like to express my gratitude to all who attended and the 8th Dirgahayu Faculty of Medicine & Health Sciences, Jambi University.

JAYALAH ... FKIK UNJa ... UNJA SMART..FKIK UNGGUL

Let me convey the rhyme as the culture of the Jambi's people,

Jika ada duren belah,
Jangan makan seorang diri.
Jika ada kata yang salah
Mohon maafkan sepenuh hati.

Senyum tulus bukan basa basi,
Lisan manis tiada berduri.
Cukup sekian dan terimakasih,
Wassalamu alaikum kami akhiri

ABSTRACT

Background: BPJS Ketenagakerjaan Branch Jambi pays the highest work accident claims because it is located in an Industrial Estate area. This study aims to analyze and predict the trends of employee work accidents for policy making among participants in BPJS Ketenagakerjaan Branch Jambi.

Method: This type of research is a mixed method research. The population and sample in this study are all occupational accident data at companies that submit claims to BPJS Ketenagaker-Jaan 2015-2019 as the unit of analysis and 10 in-formers for interviews. The data will be analyzed to predict the trend of workplace accidents using linear regression tests and for-mulated policy making using decision tree analysis.

Result: The results of the research on the highest trend of work accidents in 2018 were 1830 accidents (26.6%). The trend prediction for the next 5 years is that the highest accidents occur in 2024, namely 3310 accidents (24%).

Conclusion: The conclusion of policy making for the industry is the pro-curement of PPE, training, giving sanctions, monitoring and peri-odically maintaining work machines and tools, making hazard communications and safety signs in the workplace, and safety talk.
