Editor and Reviewer comments:

Reviewer #1:

1. The literature review refers to engaging experience and studies elsewhere, but it is not well linked to the research and, therefore, the conclusions.
2. The English in parts approaches is incomprehensible, so as a first step, a firm editorial hand would be needed to figure out what needs to be rethought.
3. The paper has some interesting information, and the topic is essential; however, there seem to be some basic questions suggesting flaws in the questionnaire, which put the conclusions in question.
4. There should be more information about the object of research, not about the content of the study.
5. The paper's focus is more applicable to Indonesia Only. How about other countries and the questionnaire?

I hope your team can make improvements as soon as possible and send the revised manuscript again via this email.

Dear

Willia Novita Eka Rini, et.al.
Universitas Jambi, Indonesia

Thank you for your team's efforts to make improvements to the manuscript.

Based on the Reviewers' considerations, the manuscript has, at some point, increased.

However, your team has to improve on a few more points. Hopefully, your team is willing to do it.

Please follow the following revision instructions:

#Reviewer 2:

1. When study design comes into play, there are serious questions about the system.
2. I was hopeful that this manuscript would be readily usable though the English in parts is so low that reading is challenging.
3. The topic is of great importance. A side note is that it's not clear what the title references in the manuscript.
4. The literature review includes some tantalizing references, but the links are not made to the specific study even after sorting through the language issues.
5. It might be publishable if the Author could work with a robust English language editor or colleague to clean up both language and argument.

Manuscripts that have been revised, and please send them back via this email.
