WG: FD6 Proceedings - Instructions for authors Yahoo/Inbox

Dear Participants,  
please find a brief instruction for authors for the workshop papers. We would kindly ask you to follow the proposed format as far as possible. All contributions will later be compiled in a proceedings volume that will be published with ISBN number via a publishing house in Göttingen. Therefore it is most important that you consider all aspects of good practice in science. We therefore expect each author (on behalf of possible co-authors) to sign an authors declaration (example attached, please do not fill out now and wait for further instructions!) that will later be submitted together with the manuscript. There will be a language review of all documents and a rudimentary review process. However, we are not able to organize a full scientific review of all papers because of time limitations.  
We do not expect you to send your manuscript before the workshop! Last year we had a deadline for submission of all contributions at the end of december and probably we will follow the same procedure for this year. Further discussion and questions regarding the proceedings volume will be discussed during the workshop. You can find an example of our last year proceedings volume on the publishers website at <http://www.cuvillier.ch/flycms/en/html/30-UickI3zkPSSzrk6-iBuchdetails.htm>  
Thank you very much,  
Sabine Schreiner and Lutz Fehrmann

Dear Sabine  
I and Utsab Thapa have input our presentation title in the sheet of DAAD workshop available on the web that you have sent us few weeks ago..but we do not know why our topic is not on the list..

But it's ok, here the topic of ours:  
"Remote sensing potentials to estimate forest carbon stocks in Indonesia and Nepal in the context of REDD+"  
Presenter: Eva Achmad and Utsab Thapa

Thank you very much for your updating Sabine,  
Warm regards  
Eva
