

## **CHAPTER V**

### **CONCLUSION AND SUGGESTION**

This chapter consists of two sections. The first section describes the research' conclusion. The second section describes the research suggestions.

#### **5.1 Conclusion**

From this study it can be concluded that during the Kampus Mengajar program, the participants faced several challenges and thus employed strategies that will be describe in down below.

Several challenges of the participants during the program are: a. isolated schools' location; b. improper school's infrastructure; c. lack of learning facility; d. lack of learning resources; e. participants' problem with the school' teacher; f. participant's problem during the classroom; g. students' knowledge about English that still low; h. students' low motivation in learning and bad behaviour.

Furthermore, the researcher also found several strategies that were used by the English Department students to overcome the challenge, mostly related to increasing the teaching of English, they are: a. Using internet and b. Using various teaching method like; games, using picture, family tree, chain message, singing, short story and using PowerPoint.

In addition, during the implementation of Kampus Mengajar, the participants did not face any problems related to the language barrier, which means most of the students were able to speak in Indonesian.

## **5.2 Suggestion**

Based on the finding in this research, the suggestions through this study are as followed:

1. For the next Kampus Mengajar students

Before they joined the Kampus Mengajar, they had to prepare themselves because there were a lot of challenges that they had to face during the program. They also have to prepare strategies and patients to make the learning process go well.

2. For Kampus Mengajar program

According to the participants, the program is very good for the students, especially for the students that choose to study in the to study in the teaching education program, so they can practice their skills in the program. But there are a lot of the students who are unsatisfied because of their placement school, because there are a lot of students who were placed not in the place they asked for. So, they hoped to make the placement clearer to the students.

3. For future research

For future researchers who want to study English department students during the Kampus Mengajar program, they can use students of Kampus Mengajar in the next batch, here batch 6. They can also conduct the research using different methods, for example, the quantitative method.
