CHAPTER V

CONCLUSION AND SUGGESTION

5.1   Conclusion

Based on the findings of the study, the researcher put forward following conclusions:

1. This research shows that the implementation of Animaker videos can improve students' vocabulary achievement based on the content word (noun, verb and adjective). The researcher conducted Animaker video in improving students vocabulary. In this research, there were two cycle conducted by the research

2. The improvement of students' vocabulary achievement after being taught using Animaker videos can be seen from the result of each cycle. The result in preliminary test was 48%, cycle one was 76% and cycle two was 82%. Then also there were an improvement based on the content word, where the percentage of the student score was 40% for nouns, 33% verb and 27% for adjectives.

5.2 Suggestions

The researcher would like to give some suggestions related to this research especially for English teachers, students, and other researchers. The researcher hopes that these suggestions would be a fruitful contribution for them all.

1. For English Teacher

To make the process of learning more interesting, teacher should also apply any media such as video or strategy that attracts the students' attention and

interest. Animaker video is one of effective media that can be used in teaching vocabulary.

2. For the Students

Vocabulary is important subject to be learns, so students have to be serious and pay attention to the teacher during the process of learning. Then, Students' should do more practices as much as possible especially for memorizing the vocabulary at school or at home to make it perfect. Like watching a lot of videos using English, then putting them into practice in everyday life so that you get used to using English.

3. The Researcher

Since this study focused on vocabulary, the researcher hope that further researcher on the use of animaker videos can be conducted to develop the advancement of teaching English at high schools.
