

CHAPTER V

CONCLUSION AND SUGGESTION

This chapter presents a Conclusion and Suggestion from the researcher based on the research conducted at Jambi University. Each of these points will be explained in the following:

1.1 Conclusion

Based on the research findings and discussion, the researcher drew conclusion as generally all of the students in fifth semester English study program in academic year 2016/2017 of Jambi University used all the strategies of learning vocabulary.

In conclusion, the result of this questionnaire revealed that most of students used Metacognitive strategies as their strategy in learning vocabulary. Then the lowest strategy that they used was Translation strategies. It means that students know which strategies are important for them to learn and are essential for adequate comprehension of a passage.

1.2 Suggestions

After knowing the findings of the research, the researcher suggests some suggestions for the readers. For the English teachers after knowing the strategies used by the students in fifth semester in English department in Jambi University on learning vocabulary strategies they are expected to adjust the learning method. For the English department students, the researcher expected that the students can improve their vocabulary by using their suitable strategies on learning it, hopefully it can be used as valuable information about strategies in learning vocabulary, and can be used as references.
