

## **CHAPTER V**

### **CONCLUSION AND SUGGESTION**

#### **5.1 Conclusion**

In order to achieve learning objective, in this case listening skill, the students have their own preferred media or methods. The media are English songs, movies, newspaper, and podcast. All of these media make the participants able to achieve their listening objectives.

In order to achieve higher level of listening skill, the participants also develop their own ways to use the media they prefer. Participants prefer to practice alone in their preferred place, such as their home or room, to allow them get their autonomy in learning.

#### **5.2. Suggestion**

Based on the findings the researcher would like to give suggestions. First, the students have to practice a lot and make the practice their habit to improve listening skill and the students consider that they need to not only time but also the media, content and time too learn. Second, the teachers should encourage students' to practice listening with various media and content and to use more time to practice.
