

**MENTORING PROGRAM  
IN DESIGNING TEACHING MODULES  
FOR ENGLISH TEACHERS AT SENIOR HIGH SCHOOL  
IN JAMBI MUNICIPALITY**

*Mukminin, A; Hidayat, M; Gowon, M; Fortunasari, F; Masita, E;  
Effendi, S*

# BACKGROUND

- The ability to understand the national education curriculum is very important for teachers
- they also need to understand the expected educational goals as mandated in the curriculum.
- teachers are also required to design teaching modules as mandated by the curriculum.
- Many teachers have had experience in designing their teaching modules
- However, the Merdeka Curriculum as the most recent Indonesian National Education Curriculum has different characteristics of teaching compared to the previous curricula in Indonesia.

# OBJECTIVES

- It is necessary to provide community service activities in the form of training and assistance to school teachers in designing their teaching modules in accordance with the Merdeka Curriculum. Partnered with the Subject Teachers' Conference (MGMP)
- The subjects of this program is the English Language Teachers at the Jambi City High School level.
- The expected output target of this activity is the prototype of teaching to use by teachers in teaching in schools.
- Additionally, the video contents of this activity can be used by teachers as the models in making English learning modules at school.

# TIME AND VENUE

- This activity is a part of an on going program “Pengabdian pads Masyarakat” Universitas Jambi
- The final result of the activity is still in process.
- The activity has been held on August 8<sup>th</sup> 2024 at Gedung Erlangga Jambi
- The participants: English teachers at senior high school in Jambi municipality
- During the program, a number of discussion materials are presented:
  - Artificial Intelligence and the impact of its use,
  - Curriculum and its development from time to time,
  - Preparation and development of teaching materials using the Magicschool.ai and Conker.ai applications as well as
  - Problem-Based learning (PBL) and Project-Based learning methods. Based Learning (PjBL)
