ABSTRACT

BACKGROUND Women are vulnerable to experiencing sexual harassment, including in the cosplay community. Sexual harassment negatively impacts on victims, making it essential to understand the self-awareness of female cosplayers in preventing sexual harassment.

OBJECTIVE This study aimed to explore the self-awareness of female cosplayers and the factors that influenced their self-awareness in preventing sexual harassment within the "X" Cosplay Community in Jambi City.

METHOD This study employed a qualitative method with a phenomenological approach. Data were collected through in-depth interviews with participants. Participants were female cosplayers active for over a year and aged 18-25. Data were analyzed using the Interpretative Phenomenological Analysis technique.

RESULTS The self-awareness of female cosplayers in preventing sexual harassment encompassed several themes, including understanding, vigilance and alertness, personal boundaries, communication, social support, self-disclosure, sense of safety and comfort, empathy, and negative emotions. The factors that influenced their self-awareness included experiences of sexual harassment, knowledge, and victim blaming.

CONCLUSION The self-awareness of participants in preventing sexual harassment was reflected through several aspects, namely understanding, vigilance and alertness, personal boundaries, communication, social support, self-disclosure, a sense of safety and comfort, empathy, and negative emotions. The factors that influenced their self-awareness in preventing sexual harassment included experiences of sexual harassment, knowledge, and victim blaming.
