

CHAPTER V

CONCLUSION AND SUGGESTION

This chapter covers conclusion and suggestions dealing with Students' Perception Toward English Club Program at SMP N 6 Muaro Jambi.

5.1 Conclusion

The finding of the research study revealed important points related to the students perception toward English club program. Based on the data analyzed from the questionnaire it can be concluded that the most students gave positive responses toward English club. Most of the student perceived that they prefer practicing in English club than formal learning process in class. For students English club is a place to fully practicing in English especially in speaking skill. English club also has a great power to encourage students' motivation to practice speaking with friends and made them more confidence to speak English in front of many people.

5.1 Suggestion

Based on the findings of the research, the researcher declare some suggestions for the readers, specifically for teachers and next researchers. The researcher hopes some existing perceptions from students of English club in this research could be used to open readers view about the positive advantages of English club, and optimize students' motivation in learning English. For teachers, the researcher just suggests them to make more approach to the students that join English club and communicate their problems in learning, in order to make them even more excited in learning English in English club because the researcher believes that the teachers are the expert ones that have their own way to teach English.

Last for the next researchers, the researcher suggests them to make the next research with different method, or even in specific analysis in order to analyzed and find out more about the effectiveness of English club and students' perception toward it. So, the level of knowledge of English club would be more exposed and make it as a great opportunity in school to mastering English well.
